MEMORANDUM

TO: All Executive Members of the IAGP

FROM: Dr. Joan Campos i Avillar M.D.

DATE: May 29, 1987

SUBJECT: The constitution of a permanent specialized Analytic Section in Group Analysis of the IAGP.

PURPOSE: Ever since 1970, and specially since 1980 an important number of group-analysts, individual members of our Association, have been trying to establish an international network of communication in order to further develop the work that in favor of the development of Group Analysis in theory and practice they perform in their local or national societies, institutes and organizations.

Most of these activities have taken place so far at events coinciding with the World Congresses organized by our Association and/or at the European Symposia in Group Analysis. At this point of history, however, and after serious consideration the below signing members of the Association believe that the aims by them pursued will be better served under the auspices and coverage offered by a specialized section considered in the Article X of the IAGP's Constitution.

The Statutes for this Section in principle will adopt for its organization the blueprint designed originally by S.H.Foulkes for GAIPAC in 1967, i.e. the one of a large continuous study group and continuous seminar constituted by a network of operative local groups linked together by correspondence and periodical face to face meetings.

COPY: To all members invited to sign the application formulated by Dr. Joan Campos i Avillar from Grup d'Anàlisi (Barcelona).
